Overview

Kindergarten to Grade 3 (Primary Programs)

Early Literacy, Early Numeracy, Integration, Diagnostic Assessment Resources

This resource list for Kindergarten to Grade 3 (Primary Programs) contains student and teaching resources that have been authorized for use in Alberta schools. These resources support both the philosophy and outcomes in the Kindergarten to Grade 3 programs of study and are focused on early literacy, early numeracy, integration across subject areas and diagnostic assessment.

Early Literacy and Early Numeracy

Literacy and numeracy development start long before children enter school. Early language and mathematical thinking is intuitive and constructivist in nature and develops as children experience the world around them.

The primary grades are key years for teachers to help students connect their natural learning with the conventional language and processes of English Language Arts and Mathematics.

Although there are stages in the development of literacy and numeracy, children experience them in different ways and at different ages. Differentiated instruction in the primary grades is intended to support individual students levels of development and move them towards being able to achieve the grade level outcomes of the Program of Studies.

Resources authorized for early literacy and early numeracy will help teachers address the needs of learners who have identified gaps in literacy and/or numeracy development that affect their ability to achieve grade level outcomes of the Program of Studies.

Integration

The Programs of Study for all subject areas, identify the outcomes for Kindergarten to Grade 3. Content is focused on what students are expected to know and be able to do.

Though organized into separate subject areas, there are many connections across the curriculum. Students see the world as a connected whole rather than as isolated segments. Integrating across content areas, and providing ways for students to make connections, enhances student learning.

The main purpose of curriculum integration is to enhance students' learning and the making of thoughtful connections. Integration may occur across two or more subjects or may include all or most curriculum areas.

Resources authorized for integration will help teachers in integrating across subject areas in the curriculum.

Diagnostic Assessment

Early language and mathematical thinking is intuitive and constructivist in nature and develops as children experience the world around them. There are stages in the development of literacy and numeracy.

Diagnostic assessments are intended to identify students' strengths and weaknesses in literacy and numeracy. Teaching and instructional strategies are used to overcome weaknesses or to build on the strengths of the learner. Emphasis is placed on process-oriented activities that focus on higher level thinking skills rather than on product-oriented activities emphasizing the mastery of discrete skills.

Resources authorized for diagnostic assessment help teachers assess the reading and numeracy levels of their students and plan instruction to meet identified gaps in their learning.

Resource Authorization Categories

Alberta Learning selects and authorizes the best possible instructional materials for the implementation of approved programs of study. The resource authorization categories for **this resource list** are: **student support and authorized teaching**. Alberta Learning also authorizes basic resources for each subject area; basic resources for language arts and mathematics are identified in the specific subject area resource lists.

Basic learning resources are those student learning resources authorized by Alberta Learning as the most appropriate for addressing the majority of outcomes of the course(s) or substantial components of the course(s); or the most appropriate for meeting general outcomes across two or more grade levels.

Student Support learning resources are those student learning resources authorized by Alberta learning to assist in addressing some of the outcomes of the course(s) or components of the course(s); or to assist in meeting the outcomes across two or more grade levels.

Authorized Teaching resources are those teaching resources identified as the best available resources to support the implementation of programs of study and courses they may be teacher guides to accompany student resources or teacher professional resources. The authorized teaching guides are listed with the student resources.

Note:

Alberta Learning strongly recommends that teachers read all selections in the student resources and all activities in the teacher guides prior to using them with students. Careful consideration should be given to the sensitivities of both the student audience and the community, and reading levels of students.

Availability

Most of the new Alberta resources are available for purchase from:

Learning Resources Centre (LRC)
12360 – 142 St, Edmonton, AB T5L 4X9
Phone: (780) 427-5775
Fax: (780) 422-9750
Internet: <http://www.lrc.learning.gov.ab.ca>

LRC order numbers and prices (as of the printing of this booklet) are included for each resource.

The cost of resources is subject to change without notice. Those resources available for purchase directly from the vendors/distributors are so noted.

Resource Annotations

Annotations providing more detailed information for these new authorized resources are under development.
